Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

# Application No. Applicant(s) 10/567,444 KAJI ET AL.

Office Action Summary	Examiner	Art Unit					
•	Robert D. Harlan	1796					
The MAILING DATE of this communication and	The MAILING DATE of this communication appears on the cover sheet with the correspondence address						
Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely field after SIX (6) MONTHS from the mailing date of this communication.  - If No principle of reply is specified advew, the maximum statetory period will apply and will expire SIX (6) MONTHS from the maining date of this communication.  - If No principle of reply is specified advew, the maximum statetory period will apply and will expire SIX (6) MONTHS from the maining date of this communication.  - Any reply received by the Office later han three months after the maining date of this communication, even if timely filed, may reduce any searched patient from adjustment. See 37 CFR 1.704(b).							
Status							
1) Responsive to communication(s) filed on							
2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.							
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is							
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.							
Disposition of Claims							
4) Claim(s) 1-7.9 and 14-25 is/are pending in the application.							
4a) Of the above claim(s) is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.							
6)⊠ Claim(s) <u>1-7.9 and 14-25</u> is/are rejected.							
7) Claim(s) is/are objected to.							
8) Claim(s) are subject to restriction and/or election requirement.							
Application Papers							
9) The specification is objected to by the Examiner.							
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.							
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).							
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).							
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.							
Priority under 35 U.S.C. § 119							
12)⊠ Acknowledgment is made of a claim for foreign	priority under 35 U.S.C. § 119(a)	)-(d) or (f).					
a)⊠ All b)□ Some * c)□ None of:							
1. Certified copies of the priority documents have been received.							
2. Certified copies of the priority documents have been received in Application No							
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage							
application from the International Bureau (PCT Rule 17.2(a)).							
* See the attached detailed Office action for a list of the certified copies not received.							
Attachment(s)							
1) Notice of References Cited (PTO-892)	4) Interview Summary						
2) Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Da 5) Notice of Informal F						
3) Information Disclosure Statement(s) (FTO/S5/08)  Paper No(s)/Mail Date	6) Other:	utom Application					

### DETAILED ACTION

- The Amendment and Petition for Time Extension filed by Applicant on 09/29/2009 have been entered.
- 2. Claims 10-13 have been canceled.
- 3. New claims 22-25 have been added.

#### Response to Amendment/Arguments

- Applicant's amendment and arguments filed on 09/29/2009 have been fully considered and they are found persuasive.
- 5. The rejection of claims 1-5, 7-17 and 20-21 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn.

### Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/567,444
Art Unit: 1796

7. Claim 3 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 3 recites a range with a range with respect to humectant. Whenever a range within a range is recited the claims are indefinite for not putting forth a definite scope.

## Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 1-5, 7 and 14-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Waki et al., U.S. Patent No. 7,008,994 (hereinafter "Waki") in view of Hendi et al., EP 0 790 281 B1 (hereinafter "Hendi"). Waki teaches an aqueous pigment dispersion, process for producing the same, and water-based ink. See Waki, Abstract; col. 2, line 58 through col. 3, line 21. Waki teaches a process comprising kneading a mixture containing

Art Unit: 1796

a styrene-(meth)acrylic acid resin, a pigment, a high-boiling solvent followed by a dispersing the mixture in an aqueous medium. See Waki, col. 3, lines 58-67; Example 1-2. The resin has an acid value of 30-300 and Mn 2,000-20,000. See Waki, col. 4, line 21. Waki teach the use of several pigments described in the claimed invention. See Waki, col. 4, lines 37-67. In example 1, the resin is a styrene-acrylic acid copolymer with a styrene-acrylic acid weight ration of 88/12 wherein the copolymer is expected to have a  $T_{\sigma}$  higher than 90C since the  $T_{\sigma}$ 's of styrene homopolymer and acrylic acid homopolymer are both much greater than 90C. Waki further teaches solvent comprising humectants. See Waki, col. 7, lines 16-29. The resin in neutralized with an organic amine during or after the kneading step. See Waki, col. 5, lines 53-67. Waki further teaches the use of planetary mixers for kneading. See col. 5, lines 42-47. The pigment dispersion is used in numerous formulations including coating and inks wherein the coatings and inks include ink-jet ink. See Waki, col. 10, lines 34-67; col. 11, lines 1-17. Thus, Waki anticipates claims 1-5, 7 and 14-25.

Application/Control Number: 10/567,444

Art Unit: 1796

## Claim Rejections - 35 USC § 103

- 10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. The factual inquiries set forth in *Graham* **v**. *John Deere*Co., 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent
  - Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 12. Claims 6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Waki et al., U.S. Patent No. 7,008,994 (hereinafter "Waki"). Regarding the claimed alkali metal hydroxide, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to

Application/Control Number: 10/567,444

Art Unit: 1796

have modified the method taught by Waki by replacing the organic amine with another base such as alkali metal hydroxide for neutralizing the carboxylic acid groups of the resin since organic amine and alkali metal hydroxide are functionally equivalent and can be used interchangeably for the purpose of neutralizing carboxylic acid groups. Such replacement would not be expected to result in ay critical impact to the dispersion.

- 13. Waki teaches water based ink jet ink comprising the disclosed pigment dispersion as discussed above. Waki fails to teach a thermal jet type printer. However, since the prior art teaches an aqueous ink for general inkjet printing and it does not teach against thermal inkjet printing, it would have been obvious to a person having ordinary skill in the art the time the invention was made to have employed a thermal ink jet printer for printing the ink taught Waki as this type of ink jet printer is popular and readily available.
- 14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert D. Harlan whose telephone number is (571) 272-1102. The examiner can normally be reached on Mon-Thu, 10 AM 8 PM.

- 15. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David W. Wu can be reached on (571) 273-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
- 16. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
